Microsoft Simplifies Home Computing
www.ijma3.org
Los Angeles, 15th May 2007

Microsoft doesn't just want people to live a digital lifestyle. The software company wants them to embrace it. That can be difficult for people who feel bombarded by the amount of digital information they've amassed and the number of devices they use to create, share and store it. Windows Rally technologies seek to help users get the most from their Windows Vista-based PCs and the new wave of innovation occurring on connected devices. Windows Rally technologies aim to make device connectivity simple, robust and more secure... Read More

Arabic Google Earth to Boost its Web Presence
www.ijma3.org
UAE, 13th May 2007

Google unveiled a new Arabic version of its popular Google Earth viewing programmed, signaling another step in its long-term plan to stimulate Internet use in the Arab world. Google

Earth is a three-dimensional viewing programmed of the planet using satellite imagery, maps and other content. The company says over 200 million people have downloaded the free programmed in the English language, or 20 per cent of the global online community. The whole objective is to grow online usage and the quality of this usage," said Sheriff Iskandar, Google regional manager... Read More

Eitesalat launches Egypt's Third Mobile Phone Network
www.eitesal.com
Egypt, 3rd May 2007

Etisalat Egypt announced the launch of their services on May 1, downplaying the anticipated pricing war in favor of a promise of better services and quality. The company, which won the bid for the third mobile network license in the middle of last year for LE 16.7 billion, announced the start of two lines of services: prepaid and postpaid. The first charges LE 0.39 per minute while the latter charges LE 0.34 per minute. Read More
